PROJECTS

BankingSystem – Full-Stack Banking Platform

- Built a full-stack retail banking system using Java 21, Spring Boot 3, MySQL, React, TypeScript and FastAPI.
- Implemented JWT authentication and role-based access control with Spring Security, plus REST APIs for customers, accounts, transactions and loans.
- Structured the project as a multi-service monorepo with OpenAPI/Swagger documentation and a dedicated KYC/verification service.
- GitHub: github.com/gimesha-adikari/BankingSystem

PDFNest – Document Processing Platform

- Built a full-stack document processing platform with React, Next.js, TypeScript, Go and FastAPI, including PDF manipulation, OCR, conversion and secure APIs.
